

WrenchFest at Wuffer's Garage and Spa

Dietmar replacing the diff sensor.

Tom & Dietmar with the diff sensor parts.

Saturday, July 20, 2019 ~ Langley, BC

It was a perfect Saturday to have a WrenchFest! Great weather and a great turn out of people and cars. In recent memory, the WrenchFests had become a social event and not much being done to cars. As you can see from the photos, there was a lot of service work and repairs being done at this WrenchFest!

Happy to report that Glen has re-purchased his 1997 840Ci from the people he sold it to several years ago. He and the 840 were in attendance.

Daryl worked on his sound system with the help of Dave and also gave his car an interior detailing. Andrew worked on his driver's side FTP and installed new trunk lid light bulbs and lenses. Both Vic and Andrew had their cars scanned with the GT1, BMW's diagnostic tool. Dietmar arrived ready to work and helped Tom (aka Wuffer) with his silver 8 Series and replaced the speedo pulse generator sensor at the differential.

Daryl explains to Dietmar how he details the interior of an E31.

Present at the WrenchFest: The cars of Henry, Tom, and Vic (foreground) and the cars of Glen, Daryl, and Andrew (background).

Tom, Vic, and Glen as Glen describes how he bought his 840Ci back.

The GT1 reading SRS fault codes on Vic's E31.
